

ENVIRONMENTAL POLICY

As manufacturer of brake systems for the automotive industry supplying to both domestic and export markets Bosch Chassis Systems Australia strives to operate in a manner that protects the environment from pollution, promotes efficiency in the use of natural resources and energy, minimises as far as practicable all waste, and is in compliance with all applicable environmental legislation and other requirements Bosch Chassis System

Through a process of continuous improvement Bosch Chassis Systems Australia aims to ensure;

- ❖ The provision of safe systems of work to prevent accidental releases and spillage's, including discharge to air, water and land.*
- ❖ That environmental consideration is taken into account when planning the development of new processes and operations.*
- ❖ That an effective standard of training and instruction are maintained for management and employees.*
- ❖ The ongoing programs of auditing, inspection and monitoring, including the establishment & review of environmental objectives & targets.*
- ❖ That all products are designed, manufactured and distributed in a manner that minimise risk to the environment.*
- ❖ That there is a consultative process that encourages employees to participate in environmental matters.*
- ❖ The conservation of resources by the efficient use of energy and the minimisation of waste.*
- ❖ The use of contractors that can demonstrate responsible and effective environmental standards.*

All managers and supervisors are accountable for environmental performance in their areas.

All employees have a responsibility to follow the procedures for protecting the environment and to report hazards to their supervisors.

A copy of Bosch Chassis Systems Australia environmental policy will be made available to the public by Internet access.
