DON'T STOP WITHOUT US

GUNITE[®]
CORPORATION

Gunite Automatic Slack Adjusters are becoming the industry standard because of their proven superior performance and reliability. The exclusive new precision fit, Collar Lock clevis design, provides a consistent tight tolerance between the push rod and the clevis. Now they offer even more advantages over competitive slacks, advantages such as self lubricating worm wheel and a new collar lock nut for quicker, simpler installation of the clevis to the push rod assembly. Gunite Automatic Slack Adjusters are available with a standard or extended clevis making installation easy on any application, truck or trailer.
